# Integrated Delivery Architecture Document

| | |
|---|---|
| **Client:** Meridian Mutual Lending Group<br>**Prepared by:** *Architect / team name* | **Date:** *Insert date*<br>**Version:** 1.0 |

**Audience:** Chief Risk Officer and production launch governance committee.

**Instruction:** Complete every table field before writing the analytical content. Analytical content should interpret the table entries and connect them to the regulated financial services scenario.

## 1. D365 and Power Platform AI Configuration Summary

### Configuration Decision Table

| Decision Area | Scenario-Specific Configuration Decision | Governance Rationale | Evidence / Owner |
|---|---|---|---|
| Business term / data semantic 1 | | | |
| Business term / data semantic 2 | | | |
| Business term / data semantic 3 | | | |
| Response behavior constraint 1 | | | |
| Response behavior constraint 2 | | | |
| Cross-channel routing logic | | | |

### WAF Gap Classification Table

| Technical Blueprint Gap | WAF Pillar | Production Risk | Remediation Design | Consistency Check |
|---|---|---|---|---|
| | | | | |

### Analytical Content (150-250 words)

## 2. Copilot Studio ALM Pipeline Summary

### Approval Gate Specification Table

| Approval Gate | Approval Authority | Validation Prerequisites | CAB Rationale | SLA for Decision |
|---|---|---|---|---|
| Production deployment approval | | | | |

### Rollback Procedure Checklist

| ✓ | Rollback Requirement | Completed Design Detail |
|---|---|---|
| | Trigger conditions identified | |
| | Production version restored | |
| | Prompt/environment variable values restored | |
| | Connection references validated after rollback | |
| | Restoration time target documented | |

### Analytical Content (150-250 words)

## 3. Microsoft Foundry Agent and Custom Model Lifecycle Summary

### Versioning Decision Table

| Version Type | Trigger in This Scenario | Promotion Process Triggered | Governance Owner |
|---|---|---|---|
| Major | | | |
| Minor | | | |
| Patch | | | |

### Drift Detection Metric Table

| Monitoring Metric | Why It Fits Financial Document Classification | Statistical Method | Alerting Threshold | Alert Type |
|---|---|---|---|---|
| | | | | |
| | | | | |
| | | | | |

### Analytical Content (150-250 words)

## 4. Integration Consistency Summary

### Integration Consistency Checklist

| Cross-Component Check | Compliant / Gap | Evidence | Resolution if Gap Exists |
|---|---|---|---|
| Deployment pipelines cover D365, Power Apps, Copilot Studio, and Microsoft Foundry components | | | |
| WAF remediation aligns with Copilot Studio ALM security controls | | | |
| Drift detection connects to Microsoft Foundry rollback procedures | | | |

### Cross-Component Governance Tension

| Tension Identified | Components Affected | Resolution Applied | What the Resolution Ensures |
|---|---|---|---|
| | | | |

### Analytical Content (150-250 words)

Export completed document as PDF for production launch readiness review.
